HANI SRI BURUGUPALLI

+91 9533697777 | haniburugupalli83@gmail.com | linkedin.com/in/haniburugupalli | Tanuku, Andhra Pradesh

PROFESSIONAL SUMMARY

Computer Science (AI & ML) undergraduate with hands-on experience designing NLP systems, full-stack AI-powered applications, and machine learning pipelines in Python. Built and shipped four independent projects spanning generative AI, NLP, and adaptive intelligence platforms, and completed a machine learning research internship at NIT Tiruchirappalli. Skilled in REST API design, prompt engineering, and cross-functional collaboration using Git-based workflows.

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, HTML5, CSS3

AI/ML: NLP, Generative AI, LLMs, Prompt Engineering

Core CS: REST API Design, SQL & Relational Databases, Data Structures & Algorithms

Tools & Platforms: Git, GitHub, VS Code, Netlify, Node.js, Express.js, React.js, SQLite

PROJECTS

MedLingo – AI Medical Translator *Python, NLP, Generative AI, LLMs, REST APIs*

- Engineered a real-time translation pipeline by integrating third-party translation APIs, converting clinical text into patient-friendly, context-aware explanations.
- Applied prompt engineering and medical terminology extraction techniques to improve translation context-accuracy for non-technical end users.

AI JobMatch Tracker *NLP, Node.js, Express.js, SQLite, REST API*

- Built an NLP-based job matching engine using skill extraction and cosine similarity to score resume-to-job relevance and surface candidate skill gaps.
- Designed and implemented a full CRUD REST API with parameterized queries and input validation, powering a real-time tracking dashboard with search and filtering.

SmartRide – Smart Carpooling & Route Matching Platform *React.js, Node.js, Express.js*

- Developed a full-stack carpooling and route-matching platform connecting users to suitable rides based on route overlap, pickup distance, travel timing, and recurring commute patterns.
- Implemented location-based services, route-matching algorithms, user authentication, and verified-user ride profiles within a responsive UI to streamline daily commute coordination.

SkillBridge AI – Adaptive Career Intelligence Platform *React.js, Python, AI/ML, NLP*

- Built an AI-powered platform analyzing resumes, project evidence, and assessment performance to verify skills and identify skill gaps for students and fresh graduates.
- Implemented adaptive assessments, career-readiness scoring, a recommendation engine, job matching, and personalized learning roadmaps to guide users toward relevant career opportunities.

INTERNSHIP EXPERIENCE

Research Intern – Machine Learning *May 2025 – Jul 2025*

National Institute of Technology (NIT), Tiruchirappalli | Tiruchirappalli, TN

- Researched core ML algorithms and predictive model architectures under faculty guidance, contributing to ongoing departmental research.
- Built end-to-end data preprocessing and validation pipelines in Python to improve model accuracy and reliability.

EDUCATION

B.Tech, Computer Science and Engineering (AI & ML) *2023 – 2027*

SASI Institute of Technology and Engineering | CGPA: 7.13

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Computer Networks

CERTIFICATIONS

- AWS Training & Certification — Developing Generative Artificial Intelligence Solutions
- AWS Training & Certification — Responsible Artificial Intelligence Practices
- Claude 101 Certification | HP LIFE — Design Thinking | ICAT Certificate of Participation
